

Electric motors

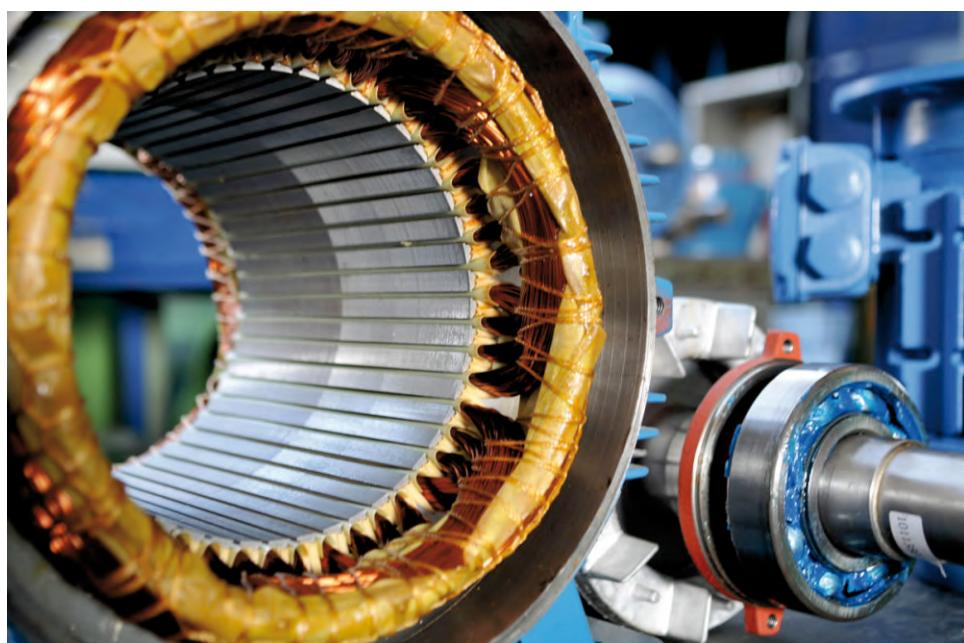

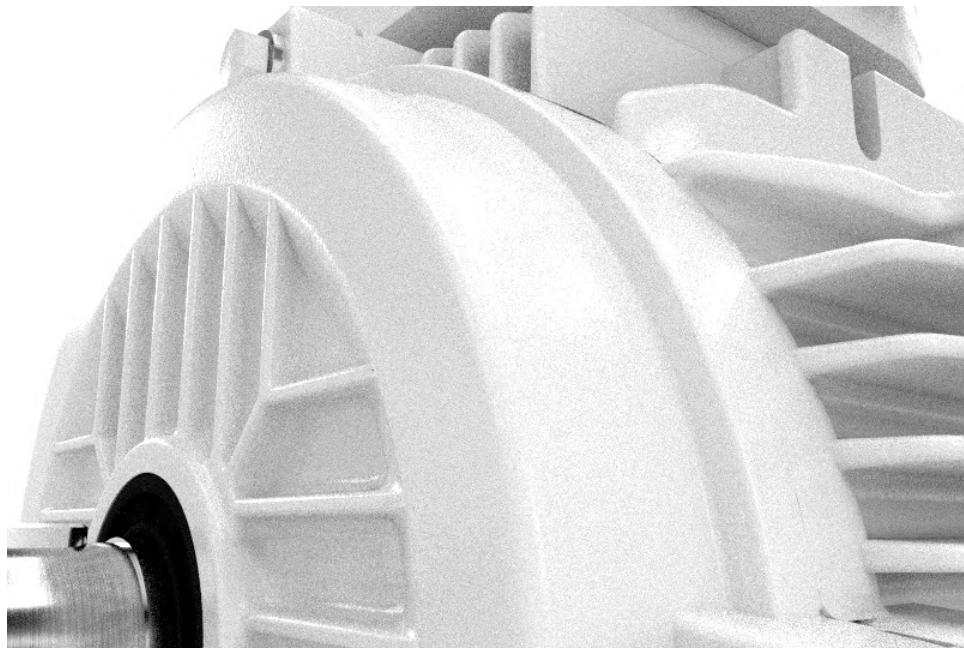

1AL, 1LC Series

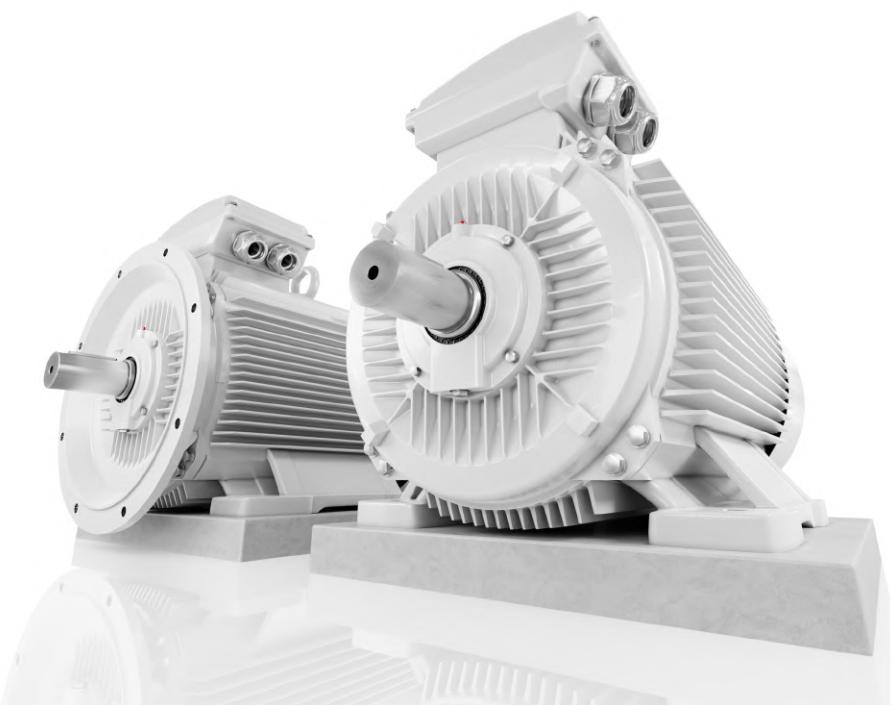

Powerful, efficient and flexible...

Technical catalogue

Low-voltage induction electric motors

AL and **LC** motors
for all types of industry

Quality management and certificates

VYBO Electric is a modern High-tech energy saving company that pays high attention to quality, environment, safety and precision and efficiency of work and energy in production. Therefore, it holds a lot of certificates and quality control systems. **Our priority is quality control.**

Basic certificates include:

ISO9001

The primary task of the ISO 9001 standard is to focus on system management and quality management in the organization. The satisfaction of the customer and the fulfillment of his requirements, which are specified in contracts, orders, or technical drawings, are in the first place. The quality management system is linked to all processes in the company. The standard focuses on the management of human and financial resources, on the stability of infrastructure, including buildings, transport, hardware, software and other communication or information technologies. An important part is also the planning of production and services, the management of the purchasing process, but also the management of non-conforming products.

ISO14001

The main priority of the ISO 14001 standard is to identify and understand the environmental aspects and activities that are related to the entire infrastructure of the company and, based on this, to regulate the environmental impact on the environment.

In its scope, the ISO 14001 standard creates the conditions for determining environmental goals and plans, the fulfillment of which is examined at regular intervals by top management and also by an independent body during internal audits.

This standard is intended for all organizations and companies that consider environmental protection as their primary goal.

The benefit of the standard for society is mainly:

- control over the environmental impact on the environment
- control over produced emissions and waste
- saving material and energy
- prevention of accidents
- compliance of the company's activities with legal requirements
- zero fines for environmental behavior
- creation of a good reputation and prestige of the company

The ISO 45001

Specification (formerly known as OHSAS 18001) is an internationally recognized standard that declares compliance with the principles of a safe enterprise, managing risks at work and protecting the health of workers during work. It does not only concern danger and accidents, but also emphasizes other aspects such as the good condition and mental well-being of the employee.

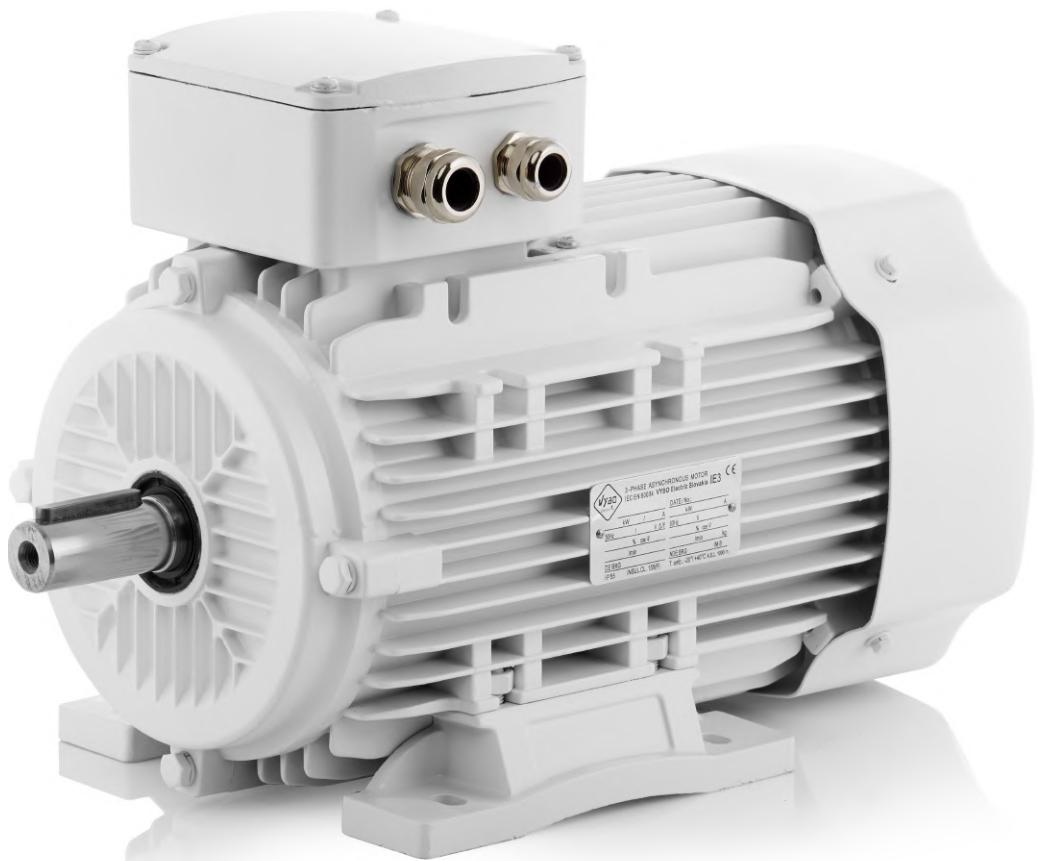

The certificate is held in Slovakia as STN ISO 45001:2019 and is under the title Management systems of safety and health protection at work. Requirements with guidance for use. It replaces the STN OHSAS 18001 standard.

ISO50001

Energy management systems Energy efficiency help organizations save money, save energy resources and also help to prevent climate change. ISO 50001 encourages organizations in all sectors to use energy more efficiently through the development of an energy management system. The international standard ISO 50001: 2011 specifies the requirements for building, maintaining and improving the energy system. It aims to enable organizations to implement a systematic approach that will help achieve lasting improvements in energy efficiency, energy use and consumption.

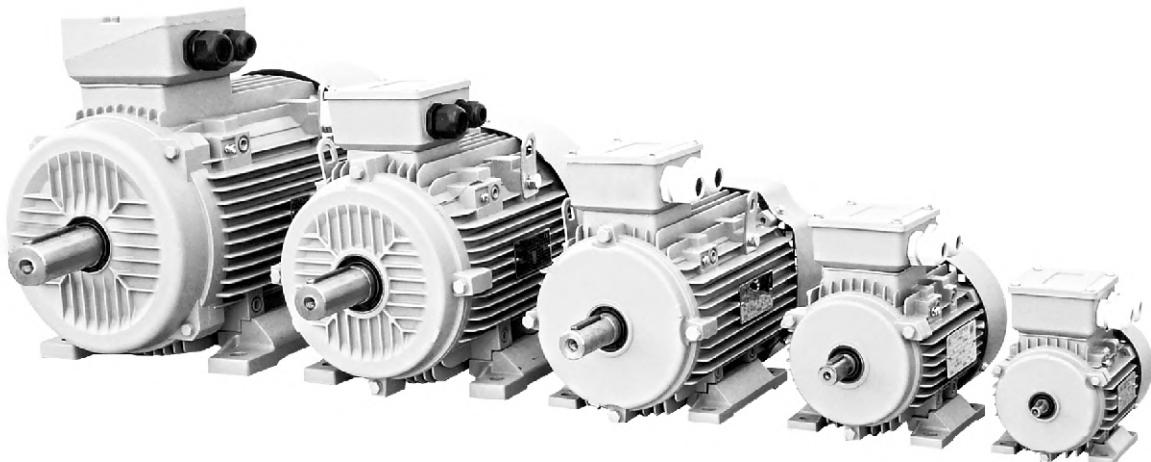

AL Series

Electric motors for standard and heavy duty in an aluminum frame

AL SERIES

Motors in AL version - low-voltage electric motors for general and heavy industry

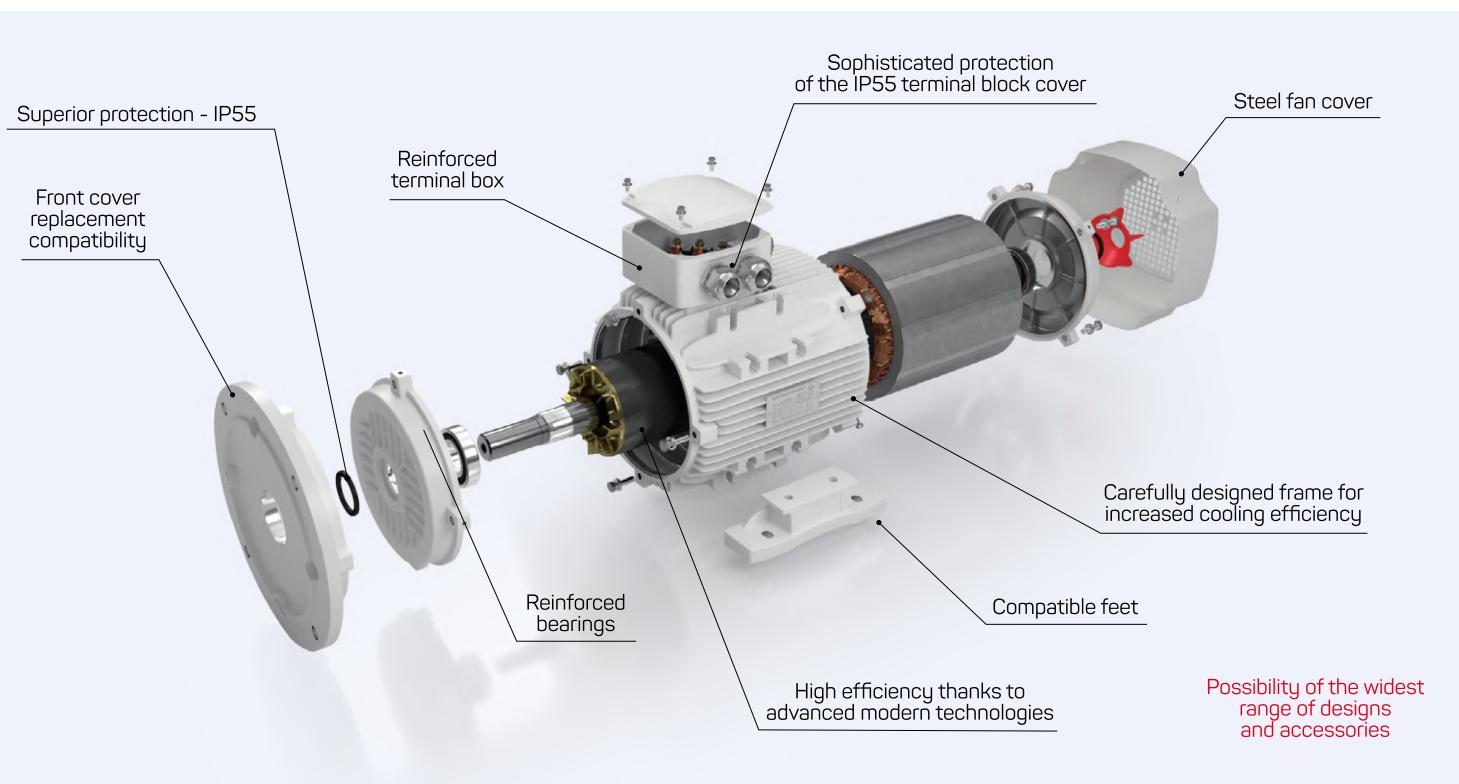

Kinetics AL Class

Types: 1AL, 2AL, 3AL, 4AL
Power from 0,12 to 18,5 kW
Efficiency classes IE1, IE2, IE3, IE4
Reinforced terminal box

Axial heights: 56 and 160 mm
Steel fan cover
Rated frequency 50Hz, 60Hz, 87Hz
Protection IP55, IP56, IP65

Voltage system 230/400/690 V
Cooling IC411
Insulation class F
Compact feet

AL SERIES

| | |
|-------------------------------|--|
| Power: | 0.06 - 22 kW |
| Speed: | 3000 / 1500 / 1000 / (750) rpm |
| Frame size: | 56 - 160 |
| Voltage: | 230/400 V, 400/690 V, 500 V |
| Frequency: | 50 / 60 Hz |
| Protection class: | IP55 |
| Efficiency class: | IE1 (Standard efficiency), IE2 (High efficiency), IE3 (Premium efficiency), IE4 (Super premium ef.) |
| Insulation class: | F/B |
| Color: | RAL 7030 (stone grey) |
| Mounting: | IM B3, IM B35, IM B5, IM B14, IM B34 |
| Cooling type: | IC 411 cooling (TENV), IC 416 cooling (TEFV) |
| Temperature: | -20 °C to +40 °C |
| Instalation height: | 1000 m above sea level |
| Frame material: | aluminium |
| Direction of rotation: | right/left |

LC Series

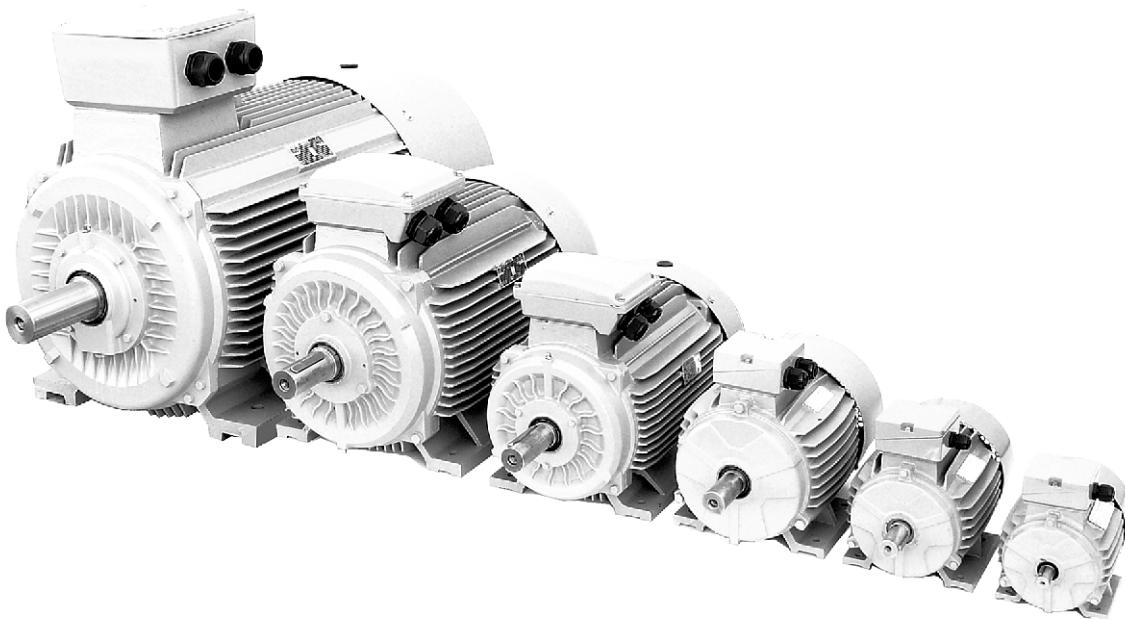

Electric motors for standard and heavy duty in a cast iron frame

SOLUTIONS FOR INDUSTRY

LC SERIES

Electric motors in LC version - performance in robustness

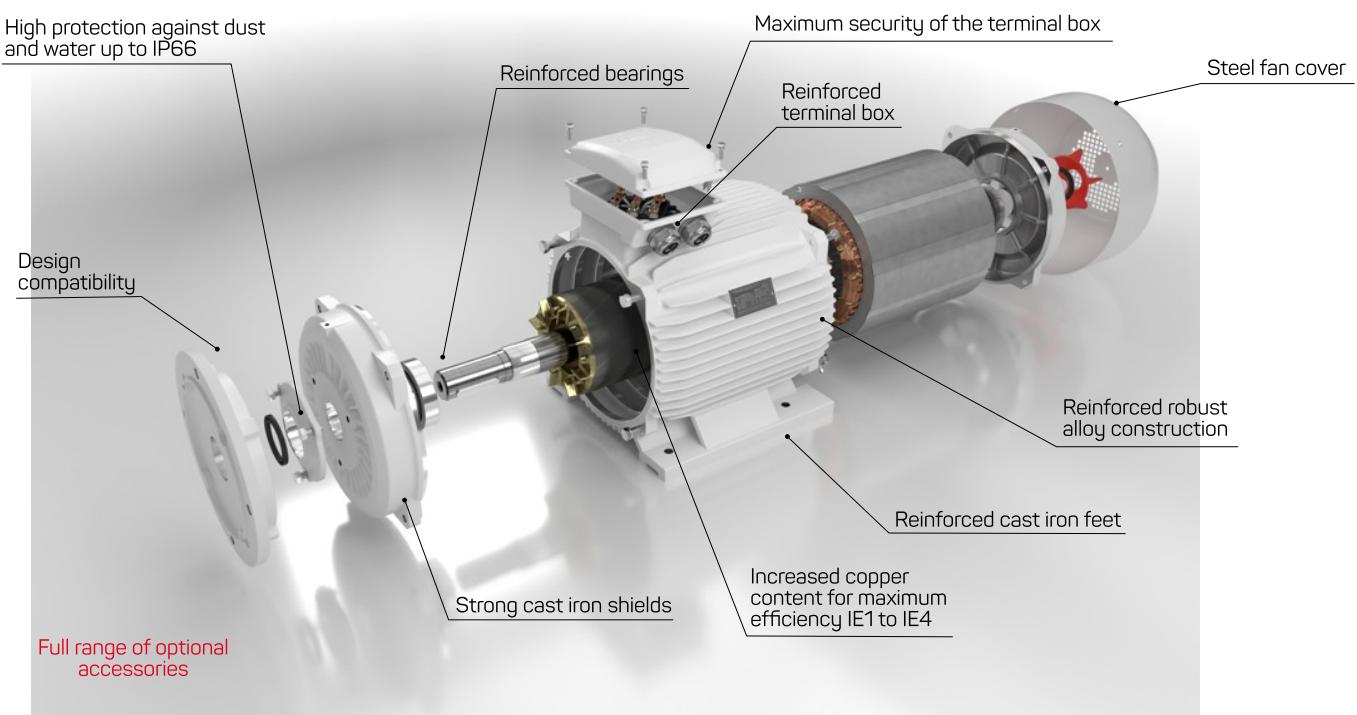

Kinetics LC Class

Cast iron frame
Top motors with high overload capacity
Heavy industrial processes
Full range of optional accessories
Power from 0,12 kW to 1000 kW
Efficiency classes IE1, IE2, IE3, IE4

Axial heights: 1LP, 2LP, 3LP - 71 to 160 mm
1LC, 2LC, 3LC - 180 to 355 mm
4LD - 355 - 450 mm
Nominal frequency 50 Hz, 60 Hz, 87 Hz
Protection IP 54, 55, 56, 65, 66
Voltage system 230/400V, 500V, 400/690V

Cooling IC411, (IC511 special)
Insulation classes F, H
Bearing relubrication system
Thermal protection - PTC thermistors
Steel fan cover
Reinforced terminal block cover

LC SERIES

| | |
|-------------------------------|--|
| Power: | 15 - 400 kW |
| Speed: | 3000 / 1500 / 1000 / (750) rpm |
| Frame size: | 160 - 355 |
| Voltage: | 230/400 V, 400/690 V, 500 V |
| Frequency: | 50 / 60 Hz |
| Protection class: | IP55 |
| Efficiency class: | IE1 (Standard efficiency), IE2 (High efficiency), IE3 (Premium efficiency), IE4 (Super premium ef.) |
| Insulation class: | F/B |
| Color: | RAL 7030 (stone gray) |
| Mounting: | IM B3, IM B35, IM B5, IM B14, IM B34 |
| Cooling type: | IC 411 cooling (TENV), IC 416 cooling (TEFV) |
| Temperature: | -20 °C to +40 °C |
| Installation height: | 1000 m above sea level |
| Frame material: | cast iron |
| Direction of rotation: | right/left |

1LC series

Electric motors for standard and heavy duty in a cast iron frame

SOLUTIONS FOR INDUSTRY

Three-phase asynchronous electric motors 1AL&1LC

Three-phase asynchronous motors of the 1AL and 1LC series developed with new techniques. 1AL and 1LC series motors are defined as fully enclosed, fan-cooled, closed rotor cage, and are characterized by new design, beautiful model, compact structure, low noise, high efficiency, large torque, excellent starting performance, easy feeding, etc.

1LC series motors can be widely used as the driving equipment of various machines, such as machine tools, blowers, pumps, compressors, conveyors, agricultural and food processing. Pedestal installation size and center height and other motor indexes completely measured by 1LC series three-phase asynchronous motor.

Operating conditions

Ambient temperature: -30°C to +50°C

Rated voltage: 380V, 400V, 415V, 440V.

Rated frequency: 50Hz, 60Hz.

Duty: S9

Insulation class: F, The temperature rise of the stator winding is investigated at 80K (by the resistance method).

Protection class: IP55.

Cooling: IC411.
